

Sportline 1 (4100 serie)

The 4100 Series shocks introduce high performance monotube technology.

They include purpose built strut and shock bodies, shortened from stock lengths.

We offer full rebuilding and revalving services for AST shocks at competitive prices.

This includes quick turn around when you need it the most

Benefits include:

- Monotube design - gives the biggest piston sizes available
- Floating piston design with high pressure nitrogen means no cavitation around the piston
- Adjuster knobs permanently mounted on the dampers
 - » New low friction seal on all AST dampers
- Rebuildable get the valving you want, when you want it.
 - » Rebound Adjustable ("Singles")
 - » 22mm diameter shaft struts, non-inverted
 - » Steel cylinder body shocks, non-inverted
 - » Rubber bushings for "eye" shock mounts
 - » Optional spherical upper shock mount assemblies
 - » Optional DLC Coated shafts
 - » Optional DDP piston (double digressive)

4000 serie dampers
Effective January , 2014

Springs included

Alfa Romeo				
Alfa 147 (937) (Tot een aslast van 990 kg wordt er een gewone demper gebruikt, vanaf een aslast van 990 kg wordt er bij de front demper een sterkere veer op gezet en wordt ACS-A1201S --> ACS-A2005S)

CUSTOM BUILD SPORTLINE I DAMPERS TO YOUR SPECS.

If your application is not listed above, we can custom build it for you in a short period of time.
 We can also build these dampers in difurent configurations like coilover rear or aluminium rear
 Please call us for an official quote for your application and delivery time.
