

Sportline II (5100 serie)

Taking the knowledge and experience learned with the 4000 Series of dampers, AST is now building the new 5000 Series dampers. One key design feature of the 5000 Series are their inverted strut design, which makes, for a very stiff strut assembly providing better suspension geometry under heavy lateral and braking loads seen in a, road course environment.

Benefits includes

- » High end, track ready suspension that is totally streetable
- » Rebound Adjustable ("Singles"), without reservoir
- » 44.5mm diameter shaft struts, Inverted
- » Aluminum cylinder, threaded body shocks, factory mounting style
- » New low friction seal on all AST dampers
- » Rubber bushings for "eye" shock mounts
- » Optional Spherical lower "eye" shock mounts
- » Optional Spherical upper shock mount assemblies
- » Optional DLC Coated shafts
- » Optional DDP piston (double digressive)

5100 serie dampers
Effective January , 2014
