NOTES

10. These lowering springs can only be used with shortened shock absorbers.
11. Not suitable for cars with level adjustment.
13. Not suitable for 4WD (four-wheel drive) cars.
14. Not suitable for station wagons.
16. For models up to 8/79, the original springs holders (Art.No.861412113B) must be used on the front axle.
21. Excluding M-models, S4 models and cars with Audi sport chassis.
25. The bumpstop must be shortend to 45 mm.
27. Not suitable for "Turbo" models.
33. Not suitable for GTI/GLI/GTE/GLE/GSI models.
44. For cars with standard lowering, the indicated lowering will be reduced with the amount of the standard lowering.
45. We recommend to use shortend shock absorbers for this set.
75. Not suitable for cars with multilink rear suspension
83. About 10mm less lowering for vehicles with Audi sport-suspension
84. About 20mm less lowering for vehicles with Audi S-line sport-suspension
85. Only suitable for vehicles with multilink rear suspension.
86. About 15mm less lowering for vehicles with sportsuspension.
87. Only suitable for vehicles with torsion-beam axle
88. Not suitable for vehicles with torsion-beam axle
99. Also suitable for Facelift model Magnetic Suspension
104. About 15mm less lowerering for vehicles with sport suspension

NOTES

- 4. Not suitable for models with EDC-system.
- 10. These lowering springs can only be used with shortened shock absorbers.
- 11. Not suitable for cars with level adjustment.
- 12. Not suitable for cars with automatic or electronic shock absorbing regulation.
- 13. Not suitable for 4WD (four-wheel drive) cars.
- 21. Excluding M-models, S4 models and cars with Audi sport chassis.
- 25. The bumpstop must be shortend to 45 mm.
- 26. In the case cars with a level regulation facility, the rear of the car can be lowered by approx. 15mm if desired by changing the settings on the level regulation system.
- 44. For cars with standard lowering, the indicated lowering will be reduced with the amount of the standard lowering.
- 65. TUV is not suitable for 540i
- 77. Only suitable for Touring cars with air suspension at the rear(set contains only front springs)
- 90. Not suitable for 2WD (Two-Wheel Drive) cars
- 95. The rear of the car can be lowered by the vehicle diagnostic system

NOTES

4. Not suitable for models with EDC-system.
6. Not suitable for 16V/20V/24V and RSI models.
10. These lowering springs can only be used with shortened shock absorbers.
11. Not suitable for cars with level adjustment.
12. Not suitable for cars with automatic or electronic shock absorbing regulation.
13. Not suitable for 4WD (four-wheel drive) cars.
14. Not suitable for station wagons.
24. Lowering only suitable at the front axle.
31. The indicated lowering is the effective lowering. Standard lowering has already been considered.
34. Conical front spring.
35. Cylindrical front springs.
45. We recommend to use shortend shock absorbers for this set.
48. This set is only useable with the original shock absorber. With other shock absorbers the lowering set will not have enough preload.
55. Mount the rear spring with the progressive part up !!, this is very important.
67. Cut off 1 ring from bump rubber
97. Not suitable for double cabin/5-seater/7-seater
98. Not suitable for 2014 facelift and later

NOTES

- 8. Not suitable for cars equipped with standard sportsuspensions.
- 9. Set only contains two rear springs.
- 11. Not suitable for cars with level adjustment.
- 13. Not suitable for 4WD (four-wheel drive) cars.
- 14. Not suitable for station wagons.
- 15. Not suitable for cars with hydropneumatic suspension.
- 19. Not suitable for cabriolet, convertible designs.
- 20. Mounting instructions for W201/202/123/124/126: Max. lowering is obtained by using single points (single stud) spring rubber bases on the front and rear axles. In case, the 3 point or 4 point rubber bases installed by the manufacturer have to be exchanged accordingly (spare part available from DB agents) in case of corresponding accessories, as automatic shifting, air conditioning etc. However on the front the 3 point or 4point rubber bases must always be used in case of trailer operation (trailer coupling) on the rear axle, 3 point rubber basses must always be used.
- 36. Not suitable for cars with Full Options.
- 37. Only for cars with Full Options.
- 44. For cars with standard lowering, the indicated lowering will be reduced with the amount of the standard lowering.
- 53. Take the rubber that is on the original spring off and put it on the loweringspring on the same place
- 70. The MB E-class S211 has standard level adjustment at the rear. So the car can be lowered at the back by setting the level adjustment. Therefore this set only contains frontsprings.
- 86. About 15mm less lowering for vehicles with sportsuspension.
- 89. Cut off 2 rings from the bottomsides of the front bumpstops for extra lowering at the front
- 90. Not suitable for 2WD (Two-Wheel Drive) cars
- 91. Set only contains 2 front springs
- 96. Not for configuration codes: SA950 / SA483 + 213, 84, the configuration codes can be taken from the data card of the vehicle
- 102. Only suitable for vehicles to chassis no. 3603471
- 103. Only suitable for vehicles from chassis no. 3603472

NOTES

9. Set only contains two rear springs.
11. Not suitable for cars with level adjustment.
13. Not suitable for 4WD (four-wheel drive) cars.
14. Not suitable for station wagons.
27. Not suitable for "Turbo" models.

Setnr.	Description	Тип	Годы выпуска	TUV	Занижение	Заметки	Стоимость
53. Take the rubber that is on the original spring off and put it on the loweringspring on the same place							
55. Mount the rear spring with the progressive part up !!, this is very important.							
80. Not suitable for Qashgai+2							
87. Only suitable for vehicles with torsion-beam axle

NOTES

- 9. Set only contains two rear springs.
- 10. These lowering springs can only be used with shortened shock absorbers.
- 11. Not suitable for cars with level adjustment.
- 13. Not suitable for 4WD (four-wheel drive) cars.

Setnr.	Description	Тип	Годы выпуска	TUV	Занижение	Заметки	Стоимость
14.	Not suitable for station wagons.						
23.	We recommend to shorten the bump stops to 30mm.						
28.	Special Tuning set. Installation must be done by professionals due to the extreme lowering of this setmodification may be necessary.						
31.	The indicated lowering is the effective lowering. Standard lowering has already been considered.						
32.	Not suitable for Kadett City.						
34.	Conical front spring.						
35.	Cylindrical front springs.						
40.	Not suitable for cars with Air Conditioning.						
41.	By choosing the lowering please note that the standard ride height in the front and in the rear is very different. After installations the lowering often appears to be different from the indicated lowering in the catalogue.						
44.	For cars with standard lowering, the indicated lowering will be reduced with the amount of the standard lowering.						
45.	We recommend to use shortend shock absorbers for this set.						
50.	Mount the front spring with the progressive part up !!, this is very important.						
51.	Take a good look how to mount the rear springs, this is very important.						
53.	Take the rubber that is on the original spring off and put it on the loweringspring on the same place						
55.	Mount the rear spring with the progressive part up !!, this is very important.						
90.	Not suitable for 2WD (Two-Wheel Drive) cars						
92.	Zu Buchstabe "E" in der 10.ten Stelle der Fzg-ident-Nr.: WOLGxxxxExxxxx/till letter "E" on the 10th digit of VIN: WOLGxxxxExxxxx

NOTES

- 3. Not suitable for 4WS (4 wheel steering) models.
- 6. Not suitable for 16V/20V/24V and RSI models.

Setnr.	Description	Тип	Годы выпуска	TUV	Занижение	Заметки	Стоимость
24. Lowering only suitable at the front axle. 33. Not suitable for GTI/GLI/GTE/GLE/GSI models. 45. We recommend to use shortend shock absorbers for this set. 47. The bumpubber from the front: cut one ring off from the middle of the rubber and glu the top back on. 51. Take a good look how to mount the rear springs, this is very important. 53. Take the rubber that is on the original spring off and put it on the loweringspring on the same place 54. Mount the rear spring with the white mark to the rear. This is very important. 55. Mount the rear spring with the progressive part up !!, this is very important. 56. Mount the rear spring with the progressive part down !!, this is very important. 82. Model year 2011, upper springseat diameter is 83mm

NOTES

- These lowering springs can only be used with shortened shock absorbers.
- Not suitable for cars with level adjustment.
- Not suitable for 4WD (four-wheel drive) cars.
- Lowering only suitable at the front axle.
- For cars with standard lowering, the indicated lowering will be reduced with the amount of the standard lowering.
- We recommend to use shortend shock absorbers for this set.
- Cut off one ring from the top of the bump rubber, always cut from the top.
- TUV only suitable with normal original bumpstop or sport original bumpstop. Do not shorten the bumpstops!! With the sport bumpstop the lowering will be a little more and also the driving will be better.
- Not suitable for cars with multilink rear suspension
- About 15mm less lowering for vehicles with sportsuspension.
- Only suitable for vehicles with torsion-beam axle
- About 10-15mm less lowering for vehicles with FR suspension.

NOTES

6. Not suitable for 16V/20V/24V and RSi models.
8. Not suitable for cars equipped with standard sportsuspensions.
9. Set only contains two rear springs.
10. These lowering springs can only be used with shortened shock absorbers.
11. Not suitable for cars with level adjustment.
13. Not suitable for 4WD (four-wheel drive) cars.
16. For models up to 8/79, the original springs holders (Art.No.861412113B) must be used on the front axle.
17. For models up to 8/79, the original springs holders (Art.No.171412341A) must be used on the front axle.
18. For cars from 10/93, it may be necessary, due to different spring holder sizes on the front axle, to use the original spring holder (Art.No.1HO-412-341).
22. For 16V + VR6 and TDi, we recommend to change to sportshock absorbers.
24. Lowering only suitable at the front axle.
28. Special Tuning set. Installation must be done by professionals due to the extreme lowering of this setmodification may be necessary.
29. The indicated lowering can differ up to 25mm due to different models and options.
30. Not suitable for VR-6 models with Air Conditioning.
31. The indicated lowering is the effective lowering. Standard lowering has already been considered.
38. Not suitable for cars with Automatic Transmission.
43. Not suitable for G40 models.
44. For cars with standard lowering, the indicated lowering will be reduced with the amount of the standard lowering.
45. We recommend to use shortend shock absorbers for this set.
66. The front bumpstop must be shortend 15 mm from topside.
69. TUV only suitable with normal original bumpstop or sport original bumpstop. Do not shorten the bumpstops!! With the sport bumpstop the lowering will be a little more and also the driving will be better.
71. This partnumber is not GOCA (TUV) approved for Belgium.
75. Not suitable for cars with multilink rear suspension
78. Not for California
85. Only suitable for vehicles with multilink rear suspension.
86. About 15mm less lowering for vehicles with sportsuspension.
87. Only suitable for vehicles with torsion-beam axle
88. Not suitable for vehicles with torsion-beam axle
100. Only for European Version

NOTES

- Not suitable for 16V/20V/24V and RSI models.
- Not suitable for cars with level adjustment.
- Not suitable for 4WD (four-wheel drive) cars.
- Not suitable for station wagons.
- Lowering only suitable at the front axle.
- For cars with standard lowering, the indicated lowering will be reduced with the amount of the standard lowering.
- For the Volvo V70 with automatic level adjustment, you can use the original shockabsorber from the Volvo S80. (Most of them don't have automatic level adjusted shock absorbers). Original Volvo shockabsorbernr: 8671-712
- Take the rubber that is on the original spring off and put it on the loweringspring on the same place
- Mount the rear spring with the progressive part up !!, this is very important.
- Mount the rear spring with the progressive part down !!, this is very important.
- Not suitable for cars with multilink rear suspension
- Not suitable for cars with sportsuspension + S-line

INFORMATION

ESSEMBLY

We recommend to have the installation of our lowering springs done by a specialist workshop having the experts and special tools. Prior to assembly, it is absolutely necessary to read the TUV expertise comparing it with the data of the car and the delivered chassis part in order to exclude future assembly and technical problems concerning the TUV.

BRAKE POWER REGULATOR

In the case of cars which are equipped with load-dependent brake power regulator on the rear axle, we recommend to check this regulator and in case, to have it re-adjusted by your specialist workshop.

ABS

In case of cars with anti-blocking system, the sensors have to be accurately re-adjusted after mounting our lowering springs.

LEVEL ADJUSTEMENT

For cars equipped with level adjustment, it must be re-adjusted after mounting our lowering springs.

WHEEL ADJUSTEMENT

After mounting our lowering springs, the wheel adjustment values have to be checked.

MEASURING METHOD

The lowering indicated by us results from the difference between the standard ride-height (distance between fender and the center of the wheel) and the ride-height after lowering. You should take into consideration that in case of lowering carried out by the factory, the dimensions are reduced by this lowering.

WARRENTY

Complaints are only received and processed if the by De Merwede b.v. sended complaintform has been filled in and returned properly. Returns are subjected to prior agreement and will be effected "delivered domicille".

NOTES

- Not suitable for Diesel models.
- Not suitable for 4WS (4 wheel steering) models.
- Not suitable for models with EDC-system.
- Not suitable for models with High-Ground-Clearing (HGC) systems.
- Not suitable for 16V/20V/24V and RSI models.
- For standard lowered cars; only suspensionkits are recommended.
- Not suitable for cars equiped with standard sportsuspensions.
- Set only contains two rear springs.
- These lowering springs can only be used with shortened shock absorbers.
- Not suitable for cars with level adjustment.
- Not suitable for cars with automatic or electronic shock absorbing regulation.
- Not suitable for 4WD (four-wheel drive) cars.

Setnr.	Description	Тип	Годы выпуска	TUV	Занижение	Заметки	Стоимость
14.	Not suitable for station wagons.						
15.	Not suitable for cars with hydropneumatic suspension.						
16.	For models up to 8/79, the original springs holders (Art.No.861412113B) must be used on the front axle.						
17.	For models up to 8/79, the original springs holders (Art.No.171412341A) must be used on the front axle.						
18.	For cars from 10/93, it may be necessary, due to different spring holder sizes on the front axle, to use the original spring holder (Art.No.1HO-412-341).						
19.	Not suitable for cabriolet, convertible designs.						
20.	Mounting instructions for W201/202/123/124/126: Max. lowering is obtained by using single points (single stud) spring rubber bases on the front and rear axles. In case, the 3 point or 4 point rubber bases installed by the manufacturer have to be exchanged accordingly (spare part available from DB agents) in case of corresponding accessories, as automatic shifting, air conditioning etc. However on the front the 3 point or 4point rubber bases must always be used in case of trailer operation (trailer coupling) on the rear axle, 3 point rubber basses must always be used.						
21.	Excluding M-models, S4 models and cars with Audi sport chassis.						
22.	For 16V + VR6 and TDI, we recommend to change to sportshock absorbers.						
23.	We recommend to shorten the bump stops to 30mm.						
24.	Lowering only suitable at the front axle.						
25.	The bumpstop must be shortend to 45 mm.						
26.	In the case cars with a level regulation facility, the rear of the car can be lowered by approx. 15mm if desired by changing the settings on the level regulation system.						
27.	Not suitable for "Turbo" models.						
28.	Special Tuning set. Installation must be done by professionals due to the extreme lowering of this setmodification may be necessary.						
29.	The indicated lowering can differ up to 25mm due to different models and options.						
30.	Not suitable for VR-6 models with Air Conditioning.						
31.	The indicated lowering is the effective lowering. Standard lowering has already been considered.						
32.	Not suitable for Kadett City.						
33.	Not suitable for GTI/GLI/GTE/GLE/GSI models.						
34.	Conical front spring.						
35.	Cylindrical front springs.						
36.	Not suitable for cars with Full Options.						
37.	Only for cars with Full Options.						
38.	Not suitable for cars with Automatic Transmission.						
39.	Only for cars with sportsuspension.						
40.	Not suitable for cars with Air Conditioning.						
41.	By choosing the lowering please note that the standard ride height in the front and in the rear is very different. After installations the lowering often appears to be different from the indicated lowering in the catalogue.						
42.	Only suitable for 2 and 4 doors.						
43.	Not suitable for G40 models.						
44.	For cars with standard lowering, the indicated lowering will be reduced with the amount of the standard lowering.						
45.	We recommend to use shortend shock absorbers for this set.						
46.	Cut off one ring from the top of the bump rubber, always cut from the top.						
47.	The bumprubber from the front: cut one ring off from the middle of the rubber and glu the top back on.						
48.	This set is only useble with the original shock absorber. With other shock absorbers the lowering set will not have enough preload.						
49.	For the Volvo V70 with automatic level adjustment, you can use the original shockabsorber from the Volvo S80. (Most of them don't have automatic level adjusted shock absorbers).Original Volvo shockabsorbernr: 8671-712						
50.	Mount the front spring with the progressive part up !!, this is very important.						
51.	Take a good look how to mount the rear springs, this is very important.						
53.	Take the rubber that is on the original spring off and put it on the loweringspring on the same place						
54.	Mount the rear spring with the white mark to the rear. This is very important.						
55.	Mount the rear spring with the progressive part up !!, this is very important.						
56.	Mount the rear spring with the progressive part down !!, this is very important.						
57.	Mount the front spring with the progressive part down !!, this is very important.						
58.	We recommend to shorten the rear bumpstop 10 mm.						
59.	Cut off the piece of the bumprubber after the plastic ring.						
60.	Lowering only suitable for rear axle						
61.	Bumpstop front : cut off 2 rings bottom / bumpstop rear: cut off 1 ring bottom						
62.	The bumpstop must be shortend to 40 mm.						
63.	Bumpstop front: cut off 20 mm from bottomside and remove plastic ring						
64.	The front bumpstop must be shortend to 20 mm.						
65.	TUV is not suitable for 540i						
66.	The front bumpstop must be shortend 15 mm from topside.						
67.	Cut off 1 ring from bump rubber						
68.	No TUV available on the stationwagon, only suitable on the saloon.						
69.	TUV only suitable with normal original bumpstop or sport original bumpstop. Do not shorten the bumpstops!! With the sport bumpstop the lowering will be a little more and also the driving will be better.						
70.	The MB E-class S211 has standard level adjustment at the rear. So the car can be lowered at the back by setting the level adjustment. Therefore this set only contains frontsprings.						
71.	This partnumber is not GOCA (TUV) approved for Belgium.						
72.	When used with a TUV certificate, be aware of the minimum height of the blinker/indicator. This must be at least 350mm. If this is not correct the blinker/indicator must be moved to another place.						
73.	From chassis nr.: 400 001						
74.	Till chassis nr.: 400 000 / set contains two different front springs, see code on springs						
75.	Not suitable for cars with multilink rear suspension
